

## Siren Voices

In Michael Scott's latest novel, *Siren Voices*, Sem Nancarrow, a successful barrister, imagines his world. It is, in his delusionary picture, being increasingly controlled by a secret conspiracy of Crocodiles, cold blooded, efficient, human in appearance only, who are changing civilization to suit themselves. Despite the horror of total world dictatorship, Sem cannot help seeing certain advantages in this absolute regime and becomes involved in its organisation. Eventually Sem comes out of his dream and sees the world as it is. The Crocodiles, are still in charge but inefficient and fighting amongst themselves, in other words, acting as normal humans. But the imaginary period has made Sem look with new eyes at the real world. He finds new courage in himself and begins to oppose the many ways in which the establishment deceives and mistreats ordinary people. It is as if he sees for the first time what he has always known. When the Crocodiles bite back, Sem suffers, as rebels often do. He just survives, as rebels often don't. Wiser, Sem discovers what now appears obvious to him; only love and humility have any value in a world dominated by greed and aggression.

In Greek mythology, the Sirens (Greek singular: ?????? Seiren Greek plural: ???????? Seirenes) were dangerous creatures, who lured nearby sailors with their enchanting music and singing voices to shipwreck on the rocky coast of their island. Roman poets placed them on some small islands called Sirenum scopuli. Siren Song. By Margaret Atwood.
